Aspiring AI Product Innovator Passionate about Sustainable Tech & Autonomous Systems.

Education

University of California, Santa Cruz BS in Technology Information Management, Minor in Computer Science
San José State University MS in Engineering technology June 2028

Summary

Innovative UCSC TIM major with CS minor and 1.5+ years in AI/ML product management. Built scalable ML models (97% accuracy) and automated workflows boosting efficiency by 30%, eager to drive AI innovations for sustainable mobility

Experience

Applied AI Engineer

San Francisco, CA

Faregrabbr

April 2026

- Identified contractor workflow pain points (scheduling conflicts, manual invoicing, fragmented job tracking) through founder collaboration and user interviews, shaping the feature roadmap for ContractorOS
- Built an AI first mobile app and backend using React, FastAPI, Claude, and Codex to deliver scheduling dashboards, invoicing, payment tracking, and job tracking interfaces that streamlined contractor operations
- Established Git-based version control and CI/CD pipelines to accelerate feature delivery, enable reliable deployments, and improve engineering collaboration alongside the founder.

Product Manager Intern

Remote

Dynabliss

June – September 2025

- Built and iterated product features using AI-powered development tools (Cursor, Claude Code, Lovable), accelerating shipping cycles at an early-stage SaaS startup
- Leveraged vibe coding workflows to rapidly prototype onboarding flows, landing pages, and customer-facing product demos, and designed and built marketing pages

Research & Data Analyst

Santa Cruz, CA

Santa Cruz Works

April – September 2025

- Designed and implemented automated CRM workflows in HubSpot, improving data integrity across 100+ partner accounts and reducing manual input by 40%
- Leveraged SQL/Python to analyze 50K+ records, informing strategies that scaled partner engagement—skills transferable to data ops in manufacturing

Projects

Smart Parrot Training Assistant | *Python, OpenAI API, Prolog*

- Developing an AI-powered training platform using Claude Code and OpenAI Codex to generate 50+ personalized parrot training routines, behavioral recommendations, and adaptive reinforcement workflows

Skills

- **AI/ML:** Python (Pandas, NumPy), TensorFlow, Machine Learning, OpenAI API, Computer Vision
- **Product:** Agile Development, Product Roadmapping, Requirements Gathering, A/B Testing, Sprint Planning, Jira, Figma
- **Data:** SQL, Power BI, Google Analytics, Data Visualization, Excel
- **Technical:** JavaScript, C/C++, Git, Docker, Kubernetes, Bash, HTML/CSS
- **Tools:** HubSpot CRM, Lucidchart, Lovable.dev
- **Certification:** [CITRIS and the Banatao Institute](#) — \$7,500 Product Innovation Internship Certificate
[Palantir Tech Fellowship](#) - Training in enterprise AI, data operations, and workflow systems
